From: Steven Boka, Director of Community Development

Re: Agreement for Engineering Services
Security Improvements & T-Hangar Apron Drainage Improvements

INTRODUCTION: The City of Muscatine continues to utilize Anderson-Bogert Engineers & Surveyors, Inc, for surveying, design and consulting services for projects at the Muscatine Municipal Airport. Future improvement projects scheduled for the airport include the installation of security fencing and camera at the termination of the recently constructed Hangar Access Road, and improvements to the apron drainage located near the T-Hangars.

BACKGROUND: The Airport Advisory Commission and the City Council agreed on a 5-year CIP for the airport that includes these two projects. The State Division of Aviation recently notified the City that both projects were selected for funding. As a result, the state will provide 85% of the funding for the installation of security fencing and the installation of a security camera at the termination of the recently constructed Hangar Access Road and drainage improvements around the T-Hangars. The City is required to provide the remaining 15% as a local match for the projects. Additional information regarding the scope of engineering services expected under this Agreement may be referred to Exhibit A-1 attached hereto.

RECOMMENDATION/RATIONALE: The attached professional services agreement has been reviewed and approved by staff. It is recommended that the City Council approve the Agreement for Engineering Services related to the installation of security fencing and camera, and apron drainage improvements near the T-Hangars – with Anderson Bogert Engineers and Surveyors as attached hereto.
