AJ –

The City has received a request from the First Presbyterian Church (401 Iowa Ave.) for a Loading Zone along their side entrance on E. 4<sup>th</sup>. The area is currently marked "No Parking". This No Parking area is located directly perpendicular to the sidewalk from the Church to the street. Members of the church use the No Parking area to load meals for the needy as well as loading/unloading handicapped members of their congregation for services and other church related functions. Unfortunately individuals have been ticketed for parking in this No Parking zone recently while engaged in church activities. The City has maintained a policy of only one Loading Zone per block in the CBD. This request meets that criterion. No parking meters would have to be removed, although the meter just west of the loading zone would have to be relocated forward by several feet. This is not a problem. If you have any questions, please contact me.
