**Subject:** Traffic Item Request: Pivotal Stop Signs on Mulberry

AJ -

The City's Traffic Committee was requested to review a proposal by the Muscatine School District to install two pivotal Stop Signs at the entrance to First Baptist Church on Mulberry. The School District has reached an agreement with the First Baptist Church to use their parking lot as a staging area for parents/guardians to drop off and pick up their children who attend Mulberry School. The purpose is to relieve the heavy traffic congestion that occurs on Mulberry (and complicated by the High Schools traffic). The pivotal Stop Signs will be activated by school staff in the morning and afternoon to allow controlled entrance and exits from the parking lot at the Church onto Mulberry Ave. We have used these pivotal Stop Signs in several other areas in the community with great success - all involving school traffic and children's safety.

It is the Traffic Committee's recommendation to install the pivotal Stop Signs on both sides of Mulberry Ave. bracketing the First Baptist Church's driveway. If there are any questions, please contact me.
